Parcel Safe

Never miss a delivery again! How many times have you ordered something and instead of it being delivered to your door you find a 'sorry we missed you' card on your doormat? The solution? Parcel Safe!

How does it work?

You leave the Parcel Safe unlocked. The delivery person is directed to use the Parcel Safe through stickers (provided). Once any parcels are deposited, the delivery person simply twists the lock to safely secure the contents. On your return, you use a key to unlock the safe and collect your delivery.

What if your parcel needs signing for?

Parcel Safes now also include a unique six digit number. This is printed on a weather proof sticker and can be placed on the lid of the Parcel Safe. The delivery agent will then take note of this number instead of requiring a signature. (Please note delivery agents are not guaranteed to use this system but hopefully it will make deliveries a little easier!)

Specification Sheet

Parcel Safe

Products available as individuals
