

Secure Laptop Lock

for protection of your laptop

How do you protect your laptop from being stolen? With a Secure Laptop Lock you will effectively deter casual thieves who may take the opportunity – and your laptop – when you leave it for just a short while.

The Secure Laptop Lock will protect your capital investment which includes private or business critical documents and will increase your laptop security. The Secure Laptop Lock helps prevent the theft of laptop/notebook computers with a built in security micro slot.

Features

The Secure Laptop Lock is available with a 2 meter long cable, which will give you an optimal protection of your laptop. The Secure Laptop Lock works with most Dell, HP/Compaq, IBM, Toshiba, Sony, Apple, Gateway, Acer, Sharp laptops.

This lock is not only for Laptops and Notebooks. It can also be used to secure tablet PC's, external/portable drivers, LCD monitors, printers, scanners, Ethernet switches, KVM switches, multiplexors, routers, wireless access points, cameras, CD players, cell phones, MP3 players, pagers, PDA's, portable TV's, and projectors with a built in security/micro slot.

Locking

The kit includes: A snap-on lock securely connected with a 2 meter long vinyl coated quality steel cable with a core diameter of 5 mm. The snap-on lock makes sure you can secure your laptop quickly and easily without using the key. The key is only needed for unlocking.

With the Secure Laptop Lock, you can lock your laptop to immovable articles such as a desk (table, drawer) leg, chair etc. on your exhibition stand, while travelling or even when teaching. Remember: the Secure Laptop Lock only works when you use it properly. You have to secure it to a strong immovable and unbreakable object.
