TV STYLE COLOUR MONITORS

The Vista TV Monitor Range is an extremely stylish and versatile range of monitoring equipment. The tasteful yet durable plastic casing ensures that not only are the monitors able to blend in with even the most demanding of design conscious environments, they are also surprisingly lightweight when compared to their steel cased counterparts.

Beauty is only skin deep though and by taking a closer look beyond the lightweight exterior will reveal a highly sophisticated monitor range. The incorporation of On-Screen Displays (OSD) for quick and easy set up, with advanced audio capability, not to mention a wide ranging power supply, should the final destination of the unit be abroad (220~240V AC), resulting in an extremely desirable unit.

For such reasons the Vista TV Monitor range is a firm favourite of those security professionals who find themselves installing CCTV monitoring systems within locations frequented by the general public.

THE UK'S PREMIER CCTV BRAND
